Re: Comments in ~~favor~~ of decoupling and energy
efficiency, Southwest Gas Company rate case,
#G-01551A-10-0458

Dear Chairman Pierce and Commissioners:

As an Arizonan who is extremely concerned about the
costs of energy and energy waste (included the associated
pollution and imbedded water usage/waste), I urge you
to support the adoption of both energy efficiency and
decoupling in the Southwest Gas rate case.

Our current system is incapable of economically
addressing energy costs while encouraging
the desperately needed conservation measures.
Drastically higher energy bills will be necessary
in the future if efficiency measures are not employed
to avoid infrastructure expenses and costs of
buying more fuel from out-of-state.

OPEN MEETING AGENDA ITEM

The Commission and utilities can help Arizonans lower energy bills. We can do this through increased energy efficiency and through decoupling, which removes the utilities' incentive to encourage waste by their customers - residential and commercial alike.

Please support both decoupling and energy conservation.

Thank you for your consideration.

Sincerely,
Paige Murphy-Young

Re: Southwest Gas Company rate case # G-01551A-10-0458
Comment in favor of Decoupling And energy efficiency

Dear Chairman Pierce and Commissioners;

As a Southwest Gas customer, I strongly urge the adoption of both energy efficiency and decoupling in the Southwest Gas rate case.

I am completely committed in conserving energy, lowering utility bills and reducing carbon. The utilities and the Commission should be helping consumers achieve lower bills through efficiency and decoupling and removing any utility incentive towards waste.

As a rate payer, I want the Commission to support both decoupling and energy conservation.

Cordially,
Joni Bosh

Re: Consumer comments in favor of decoupling and energy efficiency, #G-01551A-10-0458

Dear Chairman Pierce and Commissioners,

As a Southwest Gas customer and an Arizonan who is very concerned about the costs of energy and energy waste, I strongly urge the Arizona Corporation Commission to support the adoption of both energy efficiency and decoupling in the Southwest Gas rate case.

Our current system isn't working for me or others who are interested in conserving energy and lowering utility bills. We are sending billions of dollars and many jobs out of the state to buy fuel for our energy needs. If we don't fix the problem now, we are setting ourselves up to pay higher energy bills because utilities will buy more fuel from out of state and build more infrastructure, which we will ultimately pay for on our utility bills (PLUS interest!). To make matters worse, the current system financially rewards utilities for selling us more energy than we need. This results in wasteful energy use that drives bills higher and higher.

The Commission and the utilities should be helping Arizonans lower energy bills. We can do this through increased energy efficiency and through decoupling, which removes the utility incentive to waste.

As a ratepayer, I want you to support both decoupling and energy conservation.

Thank you for your consideration.

Sincerely,
Mr. Brent Cox
